

## **Biography of May Yousry (EgyptERA, Egypt)**

May Yousry is an experienced Energy Specialist with a demonstrated history of working in regulating Electricity Sector in Egypt. Her work is focused on developing sustainable regulatory frameworks that improve the integration of renewable energies (RE), energy efficiency and the Egyptian electricity sector structure and Power Market Design.

Currently, she is the Acting General Director of Planning Department at EgyptERA. She is involved in the on-going project for “reviewing of Regulatory Framework for Private Sector Participation in Egypt” funded by the European Bank for Restruction and Development. She was the leader of Market Design Component in the twinning project between EgyptERA, the Greek and Italian Energy Regulators in 2016.

She has more than 15 years’ significant experience in the field of financial analysis and cost of service analysis for regulated companies as well as in-depth knowledge in the field of performance assessment and developing bench-marking systems.

Ms. Yousry obtained her B.Sc. and M.Sc. focused in Electrical Power and Machines Engineering from Electrical Power and Machines Department, Faculty of Engineering, Ain Shams University, Cairo, Egypt.
