

Abdellatif Bardach is the Chairman of the Moroccan National Electricity Regulation Authority.

Mr. Bardach graduated from the industrial superior institute of Liège with an engineering diploma specialized in Electronics in 1989 and had an Executive Master of Business Administration MBA at AL AL AKHAWAYN University in 2005.

Before being appointed as the President of ANRE, Mr. BARDACH had a fulfilling career in the Electricity sector within the National Office for Electricity and Potable Water (ONEE). He held many positions such as **Director of Realization of Equipment Projects Very High Voltage Electrical Network** (2003 - 2006). **International Director in charge of the development, implementation and supervision of ONE projects abroad** (2007 - 2009) **Central Transport Network Director** (2010 - 2015), and **Central Production Director** (2015 - 2018).

Mr. BARDACH held many important positions in different institutions such as:

- President of the Maghreb interconnexion commission and Vice president of the interconnexion commission at **Arab Electricity Union**
- President of the strategic committee at the **Mediterranean Energy Cooperation**
- Vice President Mediterranean Transmission System Operator
- Vice president of **MEDGRID**
- Vice president of the **Moroccan Federation of Energy**

Author of several articles about Energy mainly in the African and Mediterranean area.

His regulator role started when The King of Morocco Mohammed VI appointed him to lead the National Electricity Regulation Authority (NERA) in August 2018. His work with the authority has been revolutionary to the Moroccan electrical market by assuring a free electricity market, regulating access to the industrial entities along with attracting private investors all over the world to assist the transformation the sector is living.
